

No. of Functional Features Included in the Solution

Date	2 October 2026
Team ID	SWTID-2026-5625
Project Name	FitBuddy
Maximum Marks	

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Interface Design	Simple, user-friendly interface where users enter their fitness details and view the generated results.	Frontend / UI	Done	0.75
2	Dynamic Template Rendering	Dynamic pages built with FastAPI and Jinja2 templates that display user inputs and AI responses.	Templates (Jinja2)	Done	0.50
3	FastAPI Backend & Routing	Backend server that defines routes and handles requests and responses between the user and the application.	Backend (FastAPI)	Done	0.75
4	User Input Handling	Captures and processes the data submitted by the user and passes it to the application logic.	Backend (FastAPI)	Done	0.50
5	Gemini AI Integration	Connects the application to a suitable Google Gemini model to generate intelligent fitness guidance.	AI / GenAI Module	Done	0.75
6	Core FitBuddy Logic	Main application logic that turns user inputs into prompts and returns relevant, AI-powered fitness responses.	Core Application Logic	Done	0.75
7	Frontend-Backend Connectivity	Links the frontend templates with backend routes so data flows smoothly through the application.	Integration Layer	Done	0.50
8	Local Deployment & Testing	Application prepared, run and tested locally to verify that all features work as expected.	Deployment / Testing	Done	0.50
	Total			8 / 8 Done	5.00

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	7
Additional / Nice-to-Have Features	1
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	User interface design, Jinja2 dynamic templates
2	Backend / Logic	4	FastAPI routing, input handling, core FitBuddy logic, local deployment & testing
3	Database / Storage	0	Not applicable (no database used)
4	API / Integration	2	Gemini AI integration, frontend-backend connectivity
5	Security / Authentication	0	Not applicable (no authentication implemented)
