Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I want to get fit, but I don’t know where to start.” • “Personal trainers and dietitians are too expensive.” • “Online workout plans are generic - none of them fit me.”	THINKS • Will I be able to stay consistent this time? • Am I doing the exercises and eating the right way? • I wish I had a coach available anytime, at low cost.
RIYA <i>Fitness Beginner (Student / Young Prof.)</i>	
DOES • Watches random YouTube/Instagram fitness videos. • Starts a routine, then skips days and gives up. • Guesses diet and calories, rarely tracks progress.	FEELS • Confused by too much conflicting advice. • Unmotivated and overwhelmed when progress is slow. • Hopeful and excited if guidance is simple and personal.
