Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statements for FitBuddy:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A beginner who wants to get fit.	Follow a structured 7-day workout and food plan.	I don't know which exercises or meals suit my age, weight, and goal.	Generic online plans aren't personalized and a personal trainer is expensive.	Confused and unmotivated.
PS-2	A working professional with a busy schedule.	Get a quick, personalized fitness plan at my preferred intensity.	I don't have time to research workouts and diets.	Planning manually takes too much effort and the results are inconsistent.	Overwhelmed and stressed.
PS-3	A user with a health condition (e.g., joint pain or diabetes).	Exercise and eat safely without worsening my condition.	Most plans ignore health limitations.	Standard plans aren't health-aware and I'm afraid of injury.	Anxious and cautious.
PS-4	A user following a fitness plan for a few weeks.	Update my plan based on my progress and feedback.	My plan stays the same even when it's too easy or too hard.	Static plans can't adapt to my feedback.	Frustrated, and likely to quit.
