

## Demonstration of Proposed Features

|                      |                                                          |
|----------------------|----------------------------------------------------------|
| <b>Date</b>          | 15 March 2026                                            |
| <b>Team ID</b>       | SWTID-2026-5625                                          |
| <b>Project Name</b>  | FitBuddy - AI Fitness Plan Generator using Gemini Models |
| <b>Maximum Marks</b> |                                                          |

### Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

| S.No | Feature Name                      | Description                                                           | Status (Implemented / Partial / Pending) | Demonstrated (Yes / No) | Remarks                         |
|------|-----------------------------------|-----------------------------------------------------------------------|------------------------------------------|-------------------------|---------------------------------|
| 1    | User Input Form                   | Collects name, age, weight, goal, intensity and optional health info. | Implemented                              | Yes                     | Built with FastAPI and Jinja2.  |
| 2    | Gemini AI Integration             | Connects to Google Gemini API (google-genai) to generate plans.       | Implemented                              | Yes                     | API key via python-dotenv.      |
| 3    | 7-Day Workout Plan                | Personalized daily workouts based on goal and intensity.              | Implemented                              | Yes                     | Shown on results page.          |
| 4    | 7-Day Food Plan                   | Personalized daily meal plan matching the user's goal.                | Implemented                              | Yes                     | Shown on results page.          |
| 5    | Nutrition, Recovery & Health Tips | Hydration, nutrition and recovery tips; health-aware workouts.        | Implemented                              | Yes                     | Uses optional health field.     |
| 6    | Feedback-Based Plan Updates       | Users submit feedback and get an updated plan.                        | Implemented                              | Yes                     | Stored with SQLAlchemy, SQLite. |

### Feature Implementation Summary:

|                                 |      |
|---------------------------------|------|
| <b>Total Features Proposed</b>  | 6    |
| Total Features Implemented      | 6    |
| Total Features Demonstrated     | 6    |
| Overall Implementation Rate (%) | 100% |
